wetenschappelijk  
verslag 2005

**WETENSCHAPPELIJK VERSLAG  
2005**

## WOORD VOORAF

Dit wetenschappelijk verslag bestaat uit de lijst van de klinisch gerichte publicaties door de stafleden van het ziekenhuis, verschenen gedurende het jaar 2005.

De publicaties worden op hun waarde geëvalueerd. Inderdaad wordt voor elk tijdschrift de impactfactor in rekening gebracht. Hoezeer besproken deze waarde-beoordeling weze, toch geeft dit een indicatie over het belang van de publicatie. Voor elke publicatie werd de laatst gepubliceerde waarde van de impactfactor (IF) aangegeven. Voor 2005 is dit de impactfactor 2004.

Vanzelfsprekend komen slechts tijdschriften, die opgenomen zijn in de lijst van de SCI Journal Citation Reports, in aanmerking voor deze telling. Dubbele vermelding, zoals wanneer eenzelfde publicatie door verschillende stafleden - mede-auteurs werd opgegeven, werd vermeden. Alle artikels werden alfabetisch gerangschikt volgens de naam van de eerste auteur, zelfs indien het geen UZA-stafid betreft. In dit geval is evenwel één van de mede-auteurs een medewerker van het ziekenhuis.

Vanaf 2003 werd niet alleen patiëntgericht onderzoek in aanmerking genomen, maar volgens afspraak in de Raad van Universitaire Ziekenhuizen van België, komt ook (dier)experimenteel onderzoek, uitgevoerd in relatie tot klinische toepassingen, aan bod. Ander dierexperimenteel onderzoek (bvb in het kader van de diergeneeskunde) en vulgariserende artikels werden niet opgenomen.

Letters in tijdschriften met impactfactor werden opgenomen in een tweede sectie.

Abstracts komen in dit verslag in principe niet voor. Boeken en publicaties in tijdschriften die niet opgenomen zijn in de SCI Journal Citation Reports werden in een derde sectie opgesomd, niet omdat zij minderwaardig zouden zijn, maar wel omdat hun belang, bij gebrek aan een meetinstrument zoals de IF, niet kan beoordeeld worden.

Wij hebben getracht in dit verslag zo volledig mogelijk te zijn. Toch is het mogelijk dat bij de compilatie een of ander artikel door conversie tussen verschillende computerprogramma's verloren is gegaan, hoewel alle opeenvolgende versies van de lijst uitgebreid werden gecontroleerd. Indien dit het geval is, bied ik de auteurs mijn excuses aan.

Dit verslag toont ten overvloede aan dat, ondanks de zeer zware klinische werkdruk, een groot aantal van onze stafleden het presteren om op een meer dan behoorlijke manier aan klinisch-wetenschappelijk onderzoek te doen, en er in slagen hun bevindingen in hoog aangeschreven medische tijdschriften te publiceren.

Prof. dr. Pierre Blockx  
Hoofdgeneesheer
