

## PhD's 2012

### Vincent Van Rompaey

*Nose, throat and ear diseases*

- Quality assurance in middle ear surgery
- Promotor: prof. dr. Paul Van de Heyning

### Bob Roozenbeek

*Neurosurgery*

- Design and analysis of randomized controlled trials in traumatic brain injury
- Promotor: prof. dr. Andrew Maas

### Tom David Van Meel

*Urology*

- Onderzoek naar de klinische waarde en relevantie van het evalueren van de afferente bezenwing van de lagere urinewegen bij de mens
- Promotor: prof. dr. Jean-Jacques Wyndaele

### David Crosiers

*Neurology*

- Genotype-phenotype correlations in Parkinson's disease: focus on non-motor symptom
- Promotor: prof. dr. Patrick Cras

### Maarten Van Den Bossche

*Psychiatry*

- In search of the missing heritability: Identifying genetic factors in schizophrenia and bipolar disorder
- Promotor: prof. dr. Bernard Sabbe

### Bert Everaert

*Cardiology*

- Endothelial nitric oxide synthase is essential for circulating angiogenic cell biology and ischemiadirected homing
- Promotor: prof. dr. Christiaan Vrints

### Botella Anali Conesa

*Clinical Biology*

- Pathogenesis of the tuberculosis-associated immune reconstitution inflammatory syndrome: role of mycobacterial load and vitamin D status?
- Promotor: prof. dr. Robert Colebunders

### Tim Van Langenhove

*Neurology*

- Clinical and molecular genetics of the frontotemporal lobar degeneration – amyotrophic lateral sclerosis spectrum
- Promotor: prof. dr. Van Broeckhoven

### Koppen Carina

*Ophthalmology*

- Corneal cross-linking and keratoconus. The change in treatment paradigm of keratoconus
- Promotor: prof. dr. Marie-José Tassignon

### Nathalie Van der Aa

*Medical genetics*

- Diagnosing patients with intellectual disability and autism in the molecular cytogenetics era
- Promotor: prof. dr. Geert Mortier
